

The next generation of *coffee urns*.

Learn more about EcoBurner.

**EVEN HEAT.
PERFECT TASTE.
ZERO WASTE.**

Introducing our brand-new coffee urn, featuring exclusive **EcoBurner** heat distribution technology.

Revolutionary Central Heat Distribution

Unlike traditional urns that heat from the base only, our innovative central heat tube distributes heat from the core and through the walls, creating natural circulation for consistent, even temperature throughout.

- Heat flows through the core, walls and upward for full coverage.
- No preheat required.
- No hot spots or temperature drop.
- Consistent heat from first cup to last.
- No bitter taste.

Adjustable Vents on Lid

- Fine-tune serving temperature
- Higher for tea as required
